Skip to Main Content Welcome to the University of Auckland's Critical Thinking course. I'm Tim Dare. And I'm Patrick Girard. And we'll be teaching this course. This course aims to help you develop and improve your logical and critical thinking skills and to identify common obstacles to effective logical and critical thinking. The key concepts are illustrated with real-life examples via a combination of videos, articles and interactive exercises. The course supports peer learning through discussions that encourage the sharing of ideas and experiences from a wide variety of contexts. Course structure We begin with an introduction to logical and critical thinking and common obstacles and fallacies. In Week 2 Patrick introduces arguments. We learn to identify premises and conclusions – components of a good argument – and by the end of this week we'll be able to construct an argument in standard form. In Week 3 we will learn how to distinguish between deductive and non-deductive arguments and about validity, invalidity, strength and weakness. In Week 4 we examine good and bad arguments in more detail, learning how to tell when an argument is sound or cogent, and how to evaluate an argument. Weeks 5-7 examine three familiar areas – science, law, and morality – that call upon our logical and critical thinking skills in ways appropriate to the particular demands of those areas. Finally in Week 8 we will apply the lessons of the course to an argument "in the wild", seeing how the skills we have developed over our eight-week journey can be used in our own lives. There will also be opportunity to interact with your course facilitator or the lead educators. The teaching team Course communication Comments and discussion: Please use the comments sections to engage with fellow learners and share your experiences. The educators may also join discussions and conversations at least once every week. If you follow them you can see all their posts. (You will learn about the ability to "follow" people alongside FutureLearn guidelines on the use of social learning tools in the next step.) In the comments sections on this course you'll see a search bar. You can search to see if other learners have been talking about a particular topic on a step, and if not then you can be the first to discuss it. Learn new skills or earn credit towards a degree at your own pace with no deadlines, using free courses from Saylor Academy. We're committed to removing barriers to education and helping you build essential skills to advance your career goals. Start learning here, or check out our full course catalog. Log in or Sign up to enroll in courses, track your progress, gain access to final exams, and get a free certificate of completion! Completing this unit should take you approximately 5 hours. Page 2 Learn new skills or earn credit towards a degree at your own pace, with deadlines, using free courses from Saylor Academy. We're committed to removing barriers to education and helping you build essential skills to advance your career goals. Choose a course below, or check out our full course catalog. Log in or Sign up to enroll in courses, track your progress, gain access to final exams, and get a free certificate of completion! In this course, you will learn how to develop your Critical Thinking Skills to help you achieve success in your university studies. After completing this course, you will be able to: 1. Use critical thinking and argumentation in university contexts to improve academic results. 2. Understand the importance and function of critical thinking in academic culture. 3. Use a variety of thinking tools to improve critical thinking. 4. Identify types of argument, and bias within arguments, in order to better evaluate the strength of arguments. 5. Use evidence to support claims in arguments. 6. Apply critical thinking and argumentation to real world problems and issues. It is our brain which processes our thoughts when we look at any situation, object, data, person etc. We have a set of preinstalled assumptions, reasons, logics biases which construct our thoughts and we can definitely change or control them to build an effective thinking skill which is called Critical Thinking. Critical Thinking is the ability to think clearly and rationally, comprehending the logical connection in a situation. It has been the subject of much thought for a lot of centuries and has continued to be a subject of discussion in today's modern world. How will this "Critical Thinking Training Course" help you in becoming a better leader? In order to be an effective leader in today's work environments, you must think out of the box and bring the right set of skills, attitudes and methods to achieve results. This Critical Thinking Training Program provides you the mindset needed to see a situation in a completely different way and will help you in making effective decisions based on right logics and evaluations. This Zoo training course will empower you in your Critical thinking by providing detailed knowledge of thoughts, logic, reasoning and arguments. This course will make you think 360 degrees about an idea and will help you make decisions effectively. Course Objectives Upon completing this "Critical Thinking Training Program" successfully, participants will be able to: 1. Understand key concepts of critical thinking. 2. Clarify the difference in cognition, reasoning and logics. 3. Improve their decision making based on facts, assumptions, arguments etc. Able to see a problem with a logical approach to find a quick solution. 4. Understand the importance of bias in critical thinking. 5. Apply Critical Thinking in practical situations. 6. Self-assess their thoughts and change them as per the requirement. Training Methodology This Critical Thinking Training Program will comprise the following training methods: Lectures, Seminars & Presentations, Assignments, Group Discussions, Case Studies. This course will also follow the 'Do-Review-Learn-Apply' model like all our other courses. Organizational Benefits Companies who nominate their employees to participate in this Critical Thinking Training Program can benefit in the following ways: More creativity from team members resulting in getting more ideas to improve business. Problems will get solved quicker due to the use of best practices by thinking about different solutions. Increase your teams' productivity by focussing on areas to be worked upon. Performance issues can be addressed and improved by better mentoring. Personal Benefits Individuals who participate in this Critical Thinking Training Program can gain from it in the following ways: Have a better understanding of a situation or an argument by thinking 360 degrees. Able to see a problem with a logical approach to solve it quickly. Build a customized self-development plan to ensure your growth in the organisation. Able to give a clear explanation of your thoughts in your presentation. Overall improvement in the mindset. Apply your critical and creative thinking to develop your own employee's performance, as well as the growth of your organisation. Who Should Attend? This Critical Thinking Training Program would be suitable for: New Employees, Potential leaders, Management professionals, Trainers, Heads of Department, Team leaders, Supervisors, Operation Managers, Technical Leaders who lead sub-teams. Aspiring leaders Course Outline MODULE 1: INTRODUCTION- Critical Thinking What are the types of thinking? What is critical thinking? Importance of critical thinking. MODULE 2: Cognitive Thinking Definition of Cognition How does your Brain Work? Evolution of Human Brain Left Brain Vs Right Brain Importance of Cognition in Critical Thinking Limitation of Cognition MODULE 3: Reasoning What is reasoning? Importance of Reasoning in Decision Making Impact of Reasoning in Critical Thinking Is reasoning always correct? Fallacious Reasoning Good and Bad Reasoning Limitations of Reasoning MODULE 4: Logical Thinking What is logic? Importance of Thinking Logically Inductive Reasoning Deductive Reasoning Impact of Logics in Critical Thinking MODULE 5: Statements and Arguments What is a Statement? What is the Argument? Understanding Assumption Conclusion MODULE 6: Six Thinking Hats Model Introduction White Hat Red Hat Black Hat Yellow Hat Blue Hat Green Hat Application of 6 Hats Tool MODULE 7: Cognitive Bias What is Cognitive Bias? Myths about Cognitive Bias Some Examples How does it impact Critical Thinking? Debiasing Strategies MODULE 8: Parts of Critical Thinking Comprehension Identification Evaluation Inference Explanation Self- Assessment MODULE 9: Time to Apply Case Studies and Story Telling Understanding the practical application of Critical Thinking Developing a powerful, positive leadership mindset Applying the tools and theories to improve Critical Thinking Final Tips
